

Grade 4

Constructed Response for Homework #1

Steps to solving a Word Problem:

1. Identify what is **known**.
2. Identify what is **unknown**.
3. **Convert** into a math problem. *Confused? Draw a picture.*
 1. Ask yourself: *What materials would help me with this problem?*
4. **Solve** the problem. Remember the **Unit of Measurement**.

You have 21 blocks. Some of the blocks are black and some of the blocks are white. There are no other blocks of any color. There are 2 times as many black blocks as white.

What **fraction** of the blocks is **white**?

Answer: _____

Explain your thinking in words and show your thinking in numbers and/or pictures.

Known

Unknown

*Remember to include your **summary sentence**.
